Summary

I'm a Computer Engineer who can adapt to any language and tech stack. I specialize in Web Development, RAG (Retrieval-Augmented Generation), AI/ML solutions, backend development with Django, Flask, Nest.js, Express.js, and frontend technologies like React, Next.js, and Three.js. I build immersive web experiences and AI-powered applications across diverse technology ecosystems.

Experience Work

AI ML Developer | Addicted Technologies (Internship) | 2024

- in Python and data handling, utilizing libraries such as NumPy, Pandas, and Matplotlib for data Proficient manipulation.
- Further Improvement Suggestion: Quantify achievements. E.g., "Developed data pipelines utilizing NumPy, Pandas, and Matplotlib, leading to X% efficiency improvement in data processing."

Python Developer | Praxware Technologies (Internship) | 2023

- Demonstrated proficiency in Python and its core libraries.
- Applied strong knowledge of Object-Oriented Programming (OOP) concepts.
- Gained hands-on experience with web frameworks including Django, Flask, and FastAPI.
- Further Improvement Suggestion: Quantify achievements. E.g., "Contributed to the development of Appointment booking system with doctor using Django and FastAPI, enhancing time management."

Skills

- MERN Stack: JavaScript (ES6+), Node.js, Express.js, React.js, MongoDB
- Frontend Technologies: React.js, HTML5, CSS3, Three.js
- Backend Technologies: Node.js, Express.js, RESTful APIs, Django, Flask, FastAPI
- AI/ML & Data Science: Machine Learning, Deep Learning, Data Science, NumPy, Pandas, Matplotlib
- Databases: MongoDB (NoSQL), Familiarity with SQL concepts
- Programming Languages: Python, JavaScript, C, C++, Java, PHP
- Tools & Methodologies: Git, npm, VS Code, Object-Oriented Programming (OOP), Problem Solving, Agile Development

Education

Diploma in Computer Engineering | Apollo Institute of Engineering and Technology (AIET) under GTU | 2022-2025

- CPI: 9.54, CGPA: 9.68
- Major in Computer Programming Language (e.g., "Focused on Python, Java, and C++ programming")

Secondary School (10th Standard) | Shree Muktajivan Vidhyalay | 2021-2022

Certifications

- AI/ML for Geodata Analysis by ISRO and IIRS (Expected Aug-2024) [Link](#)
- Introduction to Machine Learning: Art of the Possible (Mar-2024)
- Crash Course on Python by Google on Coursera (Dec-2023) [Link](#)
- Introduction to Generative AI by Google Cloud Skill Boost (Dec-2023) [Link](#)
